

ATLANTA TECHNICAL COLLEGE

Phlebotomy Pathways

The Phlebotomy Technician program trains students to become proficient in various blood collecting techniques, effective patient interaction, and language used in the medical and clinical laboratory field. The student attains an understanding of normal body structure and function, which serves as a basis for understanding conditions of infirmity and also the basic principles of law as it relates to the health care occupation. Furthermore, this program enables you to sit for national certification with The American Society for Clinical Pathologist (ASCP), to become a Certified Phlebotomy Technician PBT (ASCP)CM. Phlebotomists are employed throughout the health care system including but not limited to hospitals, public health clinics, private medical offices, medical research centers and Veterans' facilities. The clinical practicum is in a hospital clinical laboratory, outpatient / ambulatory care setting and/or physician offices. Graduates will be prepared to sit for the American Medical Technologists (AMT) Certification Exam – Phlebotomy Technician (RPT). The number of jobs in this field are projected to grow by 18% by nationally and in the State of Georgia over the next 10 years.
