

ATLANTA TECHNICAL COLLEGE

Photography Pathways

If you've ever dreamed of a career that utilizes and values your creative abilities, Atlanta Technical College's Photography program will change the way you think about work. The program focuses on honing students' raw creative energy into marketable skill sets. We use a hands on approach to learning the tools of the trade and students will be able to jump right into classes in their field from the very first semester. Throughout the course of study, students will develop portfolio pieces that they will use to seek employment upon graduation. Graduates may potentially work at in-house corporate or government marketing departments, at advertising firms, as freelancers or even on film sets.

The Photography programs train students to capture still images that may serve as commercial art. In addition to exhaustive training in camera operation, students will also focus on lighting, shooting in studio and directing models. The sequence of classes is designed to give students a taste of each major form of photography, including documentary, portraiture and shooting in controlled environments. Graduates will be capable of producing stunning photographs in a variety of scenarios. Over the next 10 years, the number of jobs in this field is projected to grow by 12.5% in the State of Georgia.
